CORPORATE UPDATE OF MCI'S ACQUISITION PROJECT

Filing of the 43-101 Report

Montreal, May 25, 2009 - MDN inc. ("MDN") is pleased to announce a corporate update of an investment transaction to acquire a majority interest in Les Minéraux Crevier Inc. ("MCI") as previously announced on April 14, 2009.

MDN has filed today, pursuant to Regulation 43-101, the technical report dated May 25, 2009 with an effective date April 6, 2009, prepared by SGS Geostat Ltd. ("the 43-101 Report"), which includes the niobium and tantalum resources on the Crevier project located North of Lac St-Jean (Québec). The 43-101 Report, confirming the niobium and tantalum resources, is available on SEDAR (www.sedar.com).

The due diligence process is in progress to both parties' satisfaction and the closing of the transaction should be completed shortly.
